---

### EDUCATION

#### BCA (bachelor of computer Application)

Mangaluru University

St philomena college darbe puttur

2021

#### Higher Secondary (computer science)

dkpue karnataka

st philomena pu college darbe puttur

2018-2020

### PROJECT

#### Netflix

Netflix projects that include various functions like login, signup, movie details, search bar and payment option. The movie data get through IMDB database, authentication handled by Firebase, every movie's trailer gets through react-youtube package manager.

#### whatsapp-web

The WhatsApp web project uses NodeJS and React to connect, while MongoDB Atlas is used to store data. Real-time chat, video, audio, image, emoji conversations, video calls, audio calls, and SMS notifications are among the features. User status (last seen, online), profile editing, and token authentication are all included in the project.
